### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of the claims is the inclusion of the limitation of the "at least one extended directional control rod (14) [being] unitarily formed" on the base member (Claim 1, Lines 6-7) and "the clamp member (4) having at least one continuous closed cross-sectional through hole (29)" (Claim 1, Lines 9-10), which are not found in the prior art references. The prior art of record, Chen, discloses a clamp member having a base member and a clamp member engaged to each other through a bed liner hole and being secured to each other by a threaded rod and having a directional control rod, but does not show the directional control rod being unitarily formed on the base member and the clamp member having at least one continuous closed cross-sectional through hole.

There is no teaching or suggestion, absent the applicant's own disclosure to modify the joint cover as disclosed by Chen to have the aforementioned elemental features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
